WRITTEN OPINION

International application No.
PCT/US02/24704

V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. STATEMENT

Novelty (N)	Claims 1-54	YES
	Claims NONE	NO
Inventive Step (IS)	Claims NONE	YES
	Claims 1-54	NO
Industrial Applicability (IA)	Claims 1-54	YES
	Claims NONE	NO

2. CITATIONS AND EXPLANATIONS

Claims 1-54 lack an inventive step under PCT Article 33(3) as being obvious over WO 99/04560.

Harms discloses a system (Fig. 1) for providing interactive media services comprising:

Memory (ROM 324, SRAM 326 or EEPROM 328) for storing interactive program guide configuration data that is used to determine an IPG screen characteristic; and Logic 318 configured to modify the IPG configuration data in response to a first user input requesting a change in the IPG screen characteristic (page 15, lines 14-page 16, lines 33). Wherein the channel listing characteristic is from a group consisting of (Fig. 7): number of channels presented concurrently 800, type of channel presented 816 (favorite), order in which channel listing are presented (Channel order; 918 of Fig. 9), identity of channels presented (ABC, ABCW, CBS...), identity of an initially highlighted channel (relative position indicator; Fig. 7), orientation of channel listing (UP/Down scrolling Bar), location of channel listing (location on the display of Fig. 6-9). Wherein the time listing characteristic is from a group consisting of (Fig. 9): number of time listing presented concurrently, coverage of a time listing, identity of time listing presented, orientation of time listings, location of time listings.

As to limitation "wherein the video area characteristic is from a group consisting of: size, location and content" Harms does not clearly disclose it. However, it is reasonably obvious for one skilled in the art to configure an area (windows) within an EPG GUI so to provide a user an option to concurrently watching a TV program while browsing the EPG.

Claims 1-54 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
